International Journal of Fracture

CONTENTS OF VOLUME 86 (1997)

Vol. 86, Nos. 1–2, 1997

Preface		1
Foreword		3–4
Some recent developments in computational modelling of concrete fracture	RENÉ DE BORST	5–36
Computational analysis of interlaminar fracture of laminated composites	F.-G. BUCHHOLZ, R. RIKARDS and H. WANG	37–58
Computational modeling of the indentation of a cracked poroelastic half-space	A.P.S. SELVADURAI and A.T. MAHYARI	59–74
Development and application of micromechanical material models for ductile fracture and creep damage	DONG-ZHI SUN, MATTHIAS SESTER and WINFRIED SCHMITT	75–90
A new generation of boundary element methods in fracture mechanics	M.H. ALIABADI	91–125
Computational dynamic fracture mechanics	T. NISHIOKA	127–159
Body force method	D.H. CHEN and H. NISITANI	161–189

Vol. 86, No. 3, 1997

The blister test – Transition from plate to membrane behaviour for an elastic material	BRIAN COTTERELL and ZHONG CHEN	191–198
Evaluation of T-stresses and stress intensity factors in stationary thermoelasticity by the conservation integral method	J. SLADEK and V. SLADEK	199–229
Computing edge singularities in elastic anisotropic three-dimensional domains	ZOHAR YOSIBASH	221–245

Cohesive crack model with rate-dependent opening and viscoelasticity: I. Mathematical model and scaling	ZDENĚK P. BAŽANT AND YUAN-NENG LI	247–265
Cohesive crack model with rate-dependent opening and viscoelasticity: II. Numerical algorithm, behavior and size effect	YUAN-NENG LI and ZDENĚK P. BAŽANT	267–288

Vol. 86, No. 4, 1997

Displacement fields around a crack tip in polymers	K. ARAKAWA and K. TAKAHASHI	289–300
Invariant points on energy contours around a crack tip under mixed mode loading	V. BONIFACE and K.R.Y. SIMHA	301–325
Plane stress steady crack growth in a power-law hardening material	T.Y. FAN, M.A. SUTTON and L.X. ZHANG	327–341
Plane strain asymptotic fields for cracks terminating at the interface between elastic and pressure-sensitive dilatant materials	HONGRONG YU, YONG-LI WU and GUOCHEN LI	343–360
Contact angle and contact mechanics of a glass/epoxy interface	K.M. LIECHTI, S.T. SCHNAPP and J.G. SWADENER	361–374
Prediction of stable crack growth using continuum damage mechanics	E. THOMAS MOYER, JR., HUGH McCOY and SHAHRAM SARKANI	375–384
A conservative integral for determining stress intensity factors of a bimaterial strip	LESLIE BANKS-SILLS	385–398
